

A TICK COMPLIANCE

In accordance with Telecommunications Labelling (Customer Equipment and Customer Cabling) Notice 2001. Part 2A - Exemption from compliance labelling for certain items.

Suppliers who are eligible to use the alternative path (and therefore not affix the A-Tick to their product) are required to maintain a publicly available register (on the Internet) listing each of their compliant cabling products individually.

Madison Technologies is an eligible supplier and has opted to use this alternative compliance arrangement. Following is a list of Madison's compliant cabling products which do not have the A-Tick affixed:
